

Outcome-Driven Cybersecurity Metrics with Seceon Platform

This metrics framework presents the key performance indicators that matter most to security leaders across detection and response, risk reduction, financial impact, operational efficiency, and compliance. Each metric is mapped directly to a specific capability within the Seceon platform.

By unifying SIEM, XDR, SOAR, UEBA, and compliance reporting into a single platform, Seceon enables organizations to measure and improve cybersecurity performance with clarity and confidence. From accelerating threat response to reducing breach costs and ensuring real-time audit readiness, this framework highlights how Seceon delivers measurable, business-aligned outcomes.

Detection & Response

Metric	Outcome	Seceon Capability
Mean Time to Detect (MTTD)	Speed of threat identification	aiSIEM, aiXDR
Mean Time to Respond (MTTR)	Fast, automated containment	aiSOAR
% Auto-Contained Incidents	Reduced manual effort	aiSOAR Playbooks
Dwell Time	Time attacker remains undetected	aiSIEM + UEBA
True Positive Rate	Precision in alerts	AI Correlation Engine

Risk Reduction

Metric	Outcome	Seceon Capability
Risk Score Trend	Posture improvement over time	aiSecurityScore360
Critical CVEs Resolved	Exposure management	Vulnerability Prioritization Engine

Metric	Outcome	Seceon Capability
Attack Surface Coverage	% of assets monitored	aiXDR coverage (IT/OT/Cloud)
Phishing CTR	User security awareness	External training + aiSIEM ingest

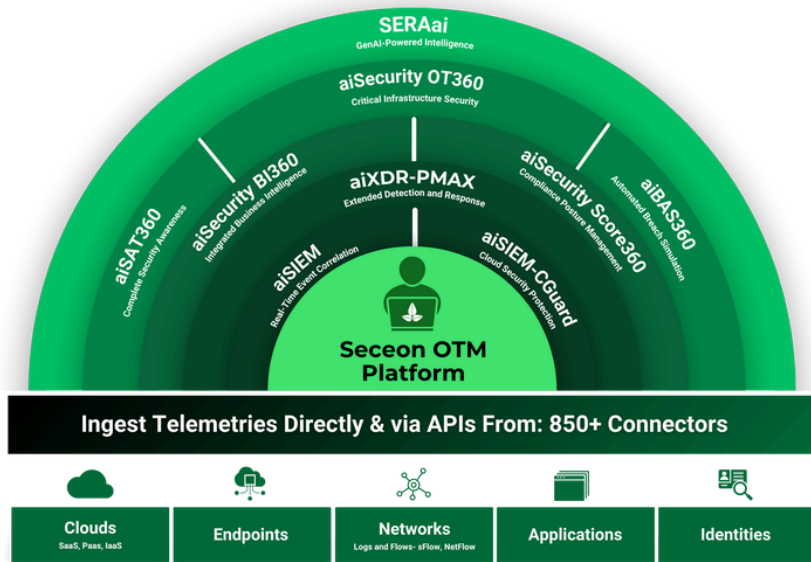

Financial Impact

Metric	Outcome	Seceon Capability
Cost per Incident Prevented	ROI on platform investment	BI360 + Risk Analytics
Estimated Value of Threats Blocked	Business loss avoided	aiSecurityScore360 Risk Mapping
SOC Automation Savings	Reduced headcount pressure	aiSOAR, aiMSSP
Insurance Benefit	Insurability boost	Audit + Compliance Reporting

Operational Efficiency

Metric	Outcome	Seceon Capability
Event Volume vs Actioned	Noise reduction	AI Alert Scoring
SLA-Based Resolution Rate	SOC performance	aiSOAR SLA workflows
MITRE ATT&CK Coverage	Detection depth	aiXDR MITRE Mapping
Tool Consolidation Ratio	Reduced complexity & cost	Unified Platform: SIEM + XDR + SOAR + TI
SOC Uptime	Always-on visibility	aiMSSP Multi-Tenant Monitoring

Metric	Outcome	Seceon Capability
Compliance Score	Real-time regulatory view	aiSecurityScore360 Mapped Controls
Policy Violation Rate	Insider risk tracking	UEBA + Policy Monitoring
3rd Party Risk	Supply chain risk insight	External TI Ingest into aiSIEM
Audit Pass Rate	Readiness and success	Audit Reports, Dashboards

About Seceon

Seceon enables MSPs and MSSPs to reduce cyber threat risks and their security stack complexity while greatly improving their ability to detect and block threats and breaches at scale. Seceon augments and automates MSP and MSSP security services with an AI and ML-powered aiSIEM, aiXDR, and aiMSSP platform. It delivers gapless coverage by collecting telemetry from logs, identity management, networks, endpoints, clouds, and applications. It's all enriched and analyzed in real-time with threat intelligence, AI and ML models built on behavioral analysis and correlation engines to create reliable, transparent detections and alerts. Over 650 partners are reselling and/or running high-margin, efficient security services with automated cyber threat remediation and continuous compliance for over 9,000 clients.
