

Seceon Platform Module Roadmap 2026-2027

Platform Integration Components

One Unified AI-Driven Threat Management Platform

Why It Matters

Modern SOCs struggle with fragmented tools, alert overload, and lack of unified visibility. Disconnected security layers create correlation gaps, slow response, and increased operational costs.

Where Growth Stalls

- Too many disconnected tools
- High alert noise and false positives
- Manual workflows slow response
- Talent shortages limit scalability

Seceon's Core Platform

- AI-powered detection across SIEM, XDR, SOAR
- Behavioral analytics with UEBA and threat intelligence
- Identity, email, and data protection (ITDR, DLP, FIM)
- Continuous compliance and risk scoring
- OT/ICS security with passive monitoring
- Sera AI for automated investigation
