

The **AI** Activity Your Security Team Can't See

The Rise of Shadow AI

Employees across every department are using generative AI tools to write emails, analyze data, summarize documents, generate code, and improve productivity.

The challenge is that most organizations have little visibility into how these tools are used, what data is shared, or whether sensitive information leaves the organization via AI platforms.

The Risks Organizations Are Facing

- Sensitive files uploaded to public AI platforms.
- Internal information copied into AI prompts.
- AI browser extensions are operating outside existing security controls.
- Growing compliance concerns around data privacy and governance.
- Rapid AI adoption without visibility or policy enforcement.

75% of knowledge workers already use AI at work, and nearly half started using AI tools without formal company approval.

Introducing Seceon aiTRISM360™

Seceon aiTRISM provides organizations with visibility into how employees interact with generative AI applications, including ChatGPT, Copilot, Claude, Perplexity, Cursor, and many others.

Unlike traditional security tools, Seceon aiTRISM360 focuses specifically on AI-related activity, helping organizations understand who used AI, which platform was accessed, and how information was shared all without capturing prompts or file contents by default.

How aiTRISM Protects Your Organization

- Detect AI Prompt Injection Attempts
- Detect AI Jailbreak Attempts
- Detect AI System Prompt Extraction Attempts
- Detect AI Data Exfiltration Attempts
- Detect AI Prompt Coercion and Obfuscated Prompt Attempts
- Detect AI Authority Impersonation Attempts

Move from blind spots to visibility with aiTRISM360 monitoring AI interactions across browsers, applications, and endpoints.

You Can't Protect What You Can't See

AI adoption is accelerating faster than traditional security controls can adapt.

Seceon aiTRISM360 gives organizations the visibility needed to embrace AI innovation while reducing data exposure, governance challenges, and compliance risk.
